DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Doran R. Pace Patent Attorney Registration No. 38,261 on June 6th, 2007.

The application has been amended as follows:

In Claim 1, in line 6, add the following phrase and structure after the phrase aryl or heteroaryl:

Claims 10-14 and 16 are cancelled.

Reasons for Allowance:

The following is an examiner's statement of reasons for allowance: The closest prior art is that of Waldmann, H et al, "New enzymatic protecting group technique for the construction of peptides and glycopeptides and glycopeptides," Biomedica Biochimica Acta (1991), Vol 50(10-11), S243-S248. Waldmann et al does not teach or suggest the phosphorylation of this small tripeptide, nor teach the additional NO₂ of the compound, such as the last structure in Claim 8. All compounds in the prior art lack the phosphotyrosine functionality instantly claimed.

Claims 1-9, 15, and 17-25 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
